

SWARAJ SHINDE

Data Scientist

Pune, India | swarajshinde24012003@gmail.com | +917028827455 | [LINKEDIN](#) | [GITHUB](#) | [LEETCODE](#)

Professional Summary

Data science professional with experience in generative AI, multi-agent systems, machine learning, and data analytics. Skilled in Python, SQL, and Excel for ETL, model development, and exploratory analysis. Currently building LLM-based applications and seeking a role focused on production-ready AI solutions.

Skills

- **Generative AI & LLM Expertise:** Generative AI, Prompt Engineering, Tool/Function Calling, AI Agents, Fine-tuning LLMs, Embeddings & Vector Search, RAG
- **LLM Frameworks & Orchestration:** LangChain (Core, Classic, Community, OpenAI, HuggingFace, Ollama, Google GenAI), LangGraph.
- **Programming Languages:** Python, SQL
- **ML, AI & Data Science Expertise:** Machine Learning, NLP, Data Science, AIML, Data Analytics, Recommendation Systems, Time Series Analysis, Clustering, Regression, Classification, Model Evaluation Metrics, Exploratory Data Analysis (EDA), ETL Pipelines, Predictive Analytics, ERP Systems
- **Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, Hugging Face Transformers, NLTK, Seaborn, MATLAB
- **Databases & Vector Stores:** MySQL, ChromaDB
- **Tools & Platforms:** Jupyter Notebook, VS Code, Google Collab, Git, GitHub, Power BI, Microsoft Excel, CVAT, Render.io, Streamlit

Professional Experience

Shivrai Technology Pvt. Ltd, Pune | Jr. Data Scientist

Dec 24 – Present

- **Project: Agentic AI-Driven Expense Estimation System**
 - Developed Agentic AI expense-estimation agents with rule-based and 4-tool-based cost modelling to automate cost analysis for farming operations, reducing manual effort by 90%.
 - Supported data-driven financial planning for 10,000+ farmers through scalable cost modelling across labour, fertilizers, and seasonal variables.
 - **Key Achievement:**
Delivered a production-ready Agentic AI system that automated complex cost estimation workflows for clients, ensuring scalable, reliable, and data-driven financial planning.
- **Project: RAG-Based Knowledge QA Chatbot**
 - Built and deployed a RAG chatbot with vector search and embedding-based retrieval, delivering context-aware answers and handling 10,000+ queries per month.
 - Automated support query resolution, reducing support workload by 40% and cutting response time.
 - **Key Achievement:**
Built a scalable RAG pipeline that consistently retrieved high-quality context, enabling reliable AI-driven knowledge assistance.
- **Project: ML-Based Sales Forecasting & Inventory Optimization**
 - Developed time-series sales forecasting models for weekly and monthly vendor orders, identifying trends and seasonal patterns to improve demand accuracy by 15%.
 - Supported supply chain and procurement decisions, improving inventory planning and reducing wastage by 70%.
 - **Key Achievement:**
Delivered a scalable forecasting solution that aligned inventory planning with demand trends, directly improving operational efficiency and margins.

- **Project: AI-Powered Meeting Summarization & Insight System**
 - Built an end-to-end meeting summarization system using Whisper for speech-to-text and GPT-based models for automated summarization and importance scoring, integrating Hugging Face models and the G4F library for efficient inference.
 - Deployed the solution on Render.io for scalable, real-time access, improving insight delivery speed by 70%.
 - **Key Achievement:**
Delivered a production-ready AI system that transformed raw meeting audio into actionable insights with high accuracy and low latency.

- Gained hands-on experience in real-world data analysis, including EDA, feature engineering, data visualization, model building, model evaluation and deployment preparation.
- Built a medicine recommendation system and a disease prediction system based on symptoms for a pharmaceutical client.
- Performed over 2,000+ image annotations using LabelMe and CVAT, significantly optimized data quality and boosting model accuracy.

Personal Projects

- PharmGPT Chatbot: | [Link](#) |

March 25
- Deployed a system using OpenAI’s GPT-4 for text generation and Stability AI’s Flux model for generating images of various yoga activities. The models were primarily trained on healthcare and pharmaceutical domain data.
- ADAS using Deep Learning: | [Link](#) |

Jun 24
- Created a system using Convolutional Neural Networks (CNNs) to accurately classify driver behaviors into 5 categories, achieving a 90% accuracy rate.

Education

- Dr. Babasaheb Ambedkar Technological University, Maharashtra

Jun 20 - Jun 24
- B-Tech in Computer Science and Engineering | CGPA: 7.5

Publications

- Placement Cell System: AI powered application for placement department of college. | [Link](#) |

• Published by IJIRSET International Journal (Paper ID – 15680/IJIRSET)

Certifications

- **Advance Machine Learning with Python.** | [Certificate](#) | Jun 24
- **Data Science Specialization.** | [Certificate](#) | Mar 24
